Periodic Finance Charge Calculation Method

Finance Charge Calculation Method and Computation of Average Daily Balance Subject to Finance Charge. The Finance Charge Calculation Method applicable to your account for Cash Advances and Credit Purchases of goods and services that you obtain through the use of your card is specified on the front side of this statement and explained below: **Method F-** Average Daily Balance (including current transactions). To avoid incurring an additional Finance Charge on the beginning balance of cash advances (and purchases if Method F is specified as applicable to purchases) reflected on your monthly statement, you must pay the beginning balance shown on your monthly statement on or before the payment due date. No grace period is provided for current cycle transactions.

The Finance Charge for a billing cycle are computed by applying the monthly periodic rate to the "average daily balance" of cash advances (and if applicable purchases). To get the average daily balance we take the beginning balance of your account each day, add any new purchases or cash advances, and subtract any payments, credits, non-accruing fees, and unpaid finance charges. This gives us the daily balance. Then we add up all the daily balances for the billing cycle and divide the total by the number of days in the billing cycle.

Method G- Average Daily Balance (including current transactions). To avoid incurring an additional Finance Charge on the balance of purchases (and cash advances, if Method G is specified as applicable to cash advances) reflected on your monthly statement and, on any new purchases (and if applicable, cash advances) appearing on your next monthly statement, you must pay the New Balance, shown on your monthly statement, on or before the payment due date. The grace period for the New Balance of purchases extends to the payment Due Date.
